## Claims

This listing of claims replaces all prior versions and listings of claims in the present application.

- 1. 16. (Cancelled)
- 17. (Currently Amended) A content on demand server system adapted to: deliver a first audio and/or video stream and to insert markers in the first stream, the markers comprising position data in the first stream;

to receive from a set top box a marker obtained from the first stream and comprising position data for the first stream for which the set top box has paused or suspended viewing, and upon a signal from the set top box to resume streaming of the first stream from a position proximate to the position data indicated by the marker;

to insert a particular number of markers into each time interval of the first stream; and to communicate the <u>particular</u> number of markers per interval [[in]] <u>of</u> the first stream to the set top box in a second stream.

- 18. (Previously Presented) The content server of claim 17 further adapted to: communicate the number of markers per interval in the first stream to the set top box in a quadrature amplitude modulated stream on a predetermined channel.
- 19. (Currently Amended) A set top box system adapted to: receive a first audio and/or video stream, the first stream comprising markers indicating positions in the first stream;
- [[to]] communicate to a server system providing the first stream a marker obtained from the first stream and comprising position data at which the set top box has paused or suspended viewing of the first stream; and
- [[to]] extract from a second stream a number <u>per interval</u> of <u>the markers indicating positions</u> per interval in the first stream.

data in the first stream;

-3-

- 20. (Previously Presented) The set top box of claim 19, further adapted to: monitor the first stream for the number of markers per interval; and if the number of markers per interval is not detected, to signal the server system to terminate the first stream.
- 21. (Currently Amended) A method comprising: inserting a particular number of markers into each time interval of a first stream; communicating the <u>particular</u> number of markers per <u>each</u> interval in the first stream to a set top box in a second stream[[.]]; delivering the first stream and inserting markers in the first stream, the markers comprising position

receiving from the set top box [[a]] one of the markers obtained from the first stream and comprising position data for the first stream for which the set top box has paused or suspended viewing;

upon a signal from the set top box, resuming streaming of the first stream from a position proximate to the position data indicated by the marker
